[Sins of the Aral Sea - National Geographic](#)

The Aral Sea dried up over several decades, leaving behind grounded ships, crumbling buildings, and starving people. While part of the sea is making a comeback, photos show how bad the damage once...

[Aral Sea's Eastern Basin Is Dry for First Time in 600 Years](#)

At one time, the Aral Sea in Central Asia was the fourth largest lake in the world. It had an area of 67,300 square kilometres. Two of the biggest rivers in Central Asia, the Amu Darya and the Syr Darya, went into the Aral Sea. But the water almost disappeared.

[The country that brought a sea back to life - BBC Future](#)

The drying up of the Aral Sea is one of the greatest environmental disasters in history. Between 1954 and 1960, the government of the former Soviet Union ord...

[What the Disappearing Aral Sea Tells Us about the Value of ...](#)

The Aral Sea was once the world's fourth-largest lake, but an irrigation project drained nearly all the water. The consequences include the loss of a fishing industry, salt-laden dust affecting crops and human health, and an altered climate. A dam has increased water levels in a small part of the lake called the North Aral.

[Aral Sea - Wikipedia](#)

Talk about a sea change: From 2006 (bottom) to 2009, Central Asia's vast Aral Sea dramatically retreated, with its eastern section losing about 80 percent of its water in just four years. The sea level of this already-shallow lake dropped about 16 meters (52.5 feet), while its shoreline recede d up to 120 kilometers (75 miles).

[Sea | National Geographic Society](#)

Especially large retreats in the eastern lobe of the South Aral Sea appear to have occurred between 2005 and 2009, when drought limited and then cut off the flow of the Amu Darya. Water levels then fluctuated annually between 2009 and 2018 in alternately dry and wet years. In 2014, the eastern lobe of the South Aral Sea completely disappeared.
